## 2. Policy and Decision-making

Proportion of Major Women in Leadership Positions in Various Fields
"Target of increasing the share of women in leadership positions to at least $30 \%$ by 2020"
Although there has been a moderate increase, the proportion of women in decision-making processes still remains low and in most fields "the target of $30 \%$ by 2020 " (referred to page 34 ) set by the Government, has yet to be achieved.

Note:

1. The Human Development Index (HDI) is a summary measure of achievements in key dimensions of human development: a long and healthy life, access to knowledge and a decent standard of living. The HDI is the geometric mean of normalized indices for each of the three dimensions.
2. The Gender Inequality Index (GII) reflects gender-based disadvantage in three dimensions-reproductive health, empowerment and the labour market. It shows the loss in potential human development due to inequality between female and male achievements in these dimensions
3. The Gender Gap Index (GGI) measures the gap between men and women in four fundamental categories (sub indexes): Economic Participation and Opportunity, Educational Attainment, Health and Survival and Political Empowerment.

Proportion of Women in Parliament

| Rank (Lower or single house) | Country | Lower or single house |  |  | Upper House or Senate |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Total | Women | Percentage of Women | Total | Women | Percentage of Women |
| 1 | Rwanda | 80 | 51 | 63.8\% | 26 | 10 | 38.5\% |
| 2 | Bolivia | 130 | 69 | 53.1\% | 36 | 17 | 47.2\% |
