7. Expansion of Women’s Participation in Policy and Decision-making Processes in All Fields of Society

Various efforts are being undertaken through the promotion of “positive action” to expand women’s participation in policy and decision-making processes in all fields of society.

Positive action
“Positive provision of opportunities for either women or men within necessary limits to redress gender disparities in terms of formation of a society where both women and men shall be given equal opportunities to participate voluntarily in activities in all fields as equal partners in society” (Article 2, The Basic Act for a Gender Equal Society)

(1) Target of “30% by 2020”

With the aim of achieving the target of “increasing the share of women in leadership positions to at least 30% by 2020 in all fields of society” (“the target of 30%”), numerical targets for women’s participation were set in the Third Basic Plan for Gender Equality for a wide range of fields, including politics, national and local civil services, private sector, education and research. The Fourth Basic Plan shows the highly ambitious targets that could be achieved if all-out efforts are made in each field such as politics, administration, economy, regional, science and technology for the expansion of women’s social participation across those fields. The plan also includes a target regarding the layer of women in previous stage who will assume leadership positions in the future.

| List of Numerical Targets in the Fourth Basic Plan for Gender Equality |
|---------------------------------|---------------|---------------|
| Proportion of Women for Each Item | Currently | Target (Deadline) |
| National Government | Proportion of women in government positions equivalent to director of central government ministries and agencies | 4.4% (July 2017) | 7% (end of fiscal 2020) |
| | Proportion of women in government positions equivalent to the chief staff levels of central government ministries and agencies | 24.2% (July 2017) | 30% (end of fiscal 2020) |
| Local Government | Proportion of women in positions equivalent to director of prefectural government (municipalities) office | 9.8% (16.9%) (2017) | 15% (20%) (end of fiscal 2020) |
| | Proportion of women in positions equivalent to the chief staff levels of prefectural government (municipalities) office | 22.4% (33.5%) (2017) | 30% (35%) (end of fiscal 2020) |
| Private Sector | Proportion of women in positions equivalent to the section manager level | 10.3% (2016) | 15% (2020) |
| | Proportion of women in positions equivalent to the subsection leader level | 18.6% (2016) | 25% (2020) |
(2) Expansion of Women’s Participation in National Diet Members

The proportion of women occupying positions as National Diet members in Japan is at a low level compared with other countries around the world. Women’s participation in the field of politics is an important task to make efforts in order to achieve the objective of raising the proportion of female election candidates for the House of Representatives and the House of Councilors to 30% by 2020. Therefore, in accordance with the Fourth Basic Plan for Gender Equality, the government has requested political parties to consider introducing positive actions to increase the proportion of women candidates in national and other elections. In addition, the government has been providing information, including a map it created that vividly shows the situation of women’s participation in politics.

(3) Recruitment and Promotion of Female National Public Employees

In the Fourth Basic Plan for Gender Equality, the government sets the target of having the proportion of female national public employees hired based on the recruitment examination reach 30% or more and to achieve this goal in the adoption of fiscal 2017. It is also, working to promote female employees with a target of having the proportion of females in managerial positions equivalent to designated service 5%, positions equivalent to director of the central government ministries 7%, positions equivalent to director of central government regional organizations or assistant director of central government ministries and agencies 12% and the subsection leader level 30%.

Note: The survey targeted the officials who are applied Salary Schedule for administrative service (1), Salary Schedule for professional administrative service, Salary Schedule for taxation service, Salary Schedule for public peace service (1), Salary Schedule for public peace service (2), Salary Schedule for designated service under the Act on Remuneration for National Public Employees (Act No. 95 of 1950,hereinafter referred to as “the Regular Service Remuneration Act”), and the Ministry of Defense employees who are receiving remuneration of an amount stipulated in the Administrative Service (I) Salary Schedule, the Designated Service Salary Schedule of the Regular Service Remuneration Act under the Act on Remuneration of Officials in the Ministry of Defense (Act No. 266 of 1952); until 2005 it included officials to whom the Defense Counselor Salary Schedule is applied.
(4) Recruitment and Promotion of Female Local Public Employees

The government is aiming to achieve a target of having the proportion of female local public employees hired based on the university graduate level examinations (advanced level examination) reach approximately 30%, and of having the proportion of female public employees in managerial positions reach approximately 10%.

Note:
1. Proportion of women among the total number of people hired by prefectural governments
2. Approximate level correlations: advanced = university graduates

(5) Expansion of Women’s Participation in National Advisory Councils and Committees Members

With regard to female national advisory councils and committees, efforts to set numerical targets and achievement deadlines have proved effective. Efforts are currently being made to achieve, by 2020, a target of having neither gender make up less than 40% of the total members of the committee as a whole. Based on a survey at the end of September 2017, the proportion of female members was 37.4%.
Proportion of Female Members in National Advisory Councils and Committees

Changes in the proportion of female researchers will be followed up under the Basic Plan for Gender Equality.

The proportion of female researchers in Japan is 15.7% (as of 2017), which is low compared to other developed nations.

6. Expansion of Women’s Participation in Private Corporation Managerial Positions

The government promotes private corporations’ various efforts to promote female employees to senior position toward achieving the target of increasing the share of female managerial level to approximate 15% by 2020.

Proportion of Women in Private Corporation Managerial Staff, by Position

(7) Expansion of Women’s Participation in Researchers

The proportion of female researchers in Japan is 15.7% (as of 2017), which is low compared to other developed nations. Changes in the proportion of female researchers will be followed up under the Basic Plan for Gender Equality.
