This year and every year, every lady should have the chance to spread a message. My message will be mainly the independance of women and the equality between men & women. We all know that a lot of women suffer from different kind of violence: verbal or physical. This should stop but it can be stop only if All the women just try to have faith and confidence in themselves 'cause confidence is the base of every succesful step in our life. Women should know that they can do everything by their own. They ~~shouldn't~~ shouldn't be ashamed of any violence they've had been into. They have to accept it and talk about it to have the strenght to move on. and be stronger. A woman is everything. She should be protected by the law.

- She should know her worth and her rights → She is capable of everything and she shouldn't forget that without her, there will be no life. She is precious.

My message on ending violence against women.....

Violence against women is a grave violation of human rights. Its impact ranges from immediate to long-term multiple physical, sexual and mental consequences for women. Violence not only has negative consequences for women but also their families, the community and the country and the country at large. I think the best way to end violence is prevention should start early in life, by educating and working with young boys and girls promoting respectful relationships and gender equality.

My message on ending violence against women.....

God is the creator of mankind. Men and women are equal and have their own abilities but women are always pushed back in this ~~men~~ male dominated society.

Women are naturally ~~weak~~ physically weaker compared to men, its scientifically as such, its how we evolved. Back then in the days it was all about physical survival and labor. But now the scenario is completely changed in this modern world today what matters is intellectuality and creativity over physical capabilities.

In today's educated and fast forward ^{world} Both men and women should ~~be~~ treated equally according to their capabilities and talent and given opportunity to grow and progress.

~~It~~ To stop violence against women should be started from our own house, we should all stand up for women to show the importance & essence of womanhood.

{Beat us Intellectually, not physically!}

Women are the greatest gift to mankind and
The abuse and neglect that such a large portion are
going through is Not okay.

Violence against women can be prevented through
awareness and talking about it. By allowing women to
feel like they are in a safe environment to
speak up about what is going on is where the solution
to this never ending problem starts. By speaking
out we challenge the attitudes towards
violence and show that it is a
crime and is unacceptable

nøe vi alle burde ha nulltoleranse for.
