My message on ending violence against women and child abuse.....

There is no greater inhumanity than hurting a child.
A child deserves a loving, caring and nurturing environment.
We should work hand in hand to protect a child's
right to live. Stop child abuse. Together we can
end this and build a safe place for them to discover
the beauty and appreciate Life.

My message on ending violence against women and child abuse....

If I'd become Miss International 2019, I want to travel around the world as an ambassador to raise child abuse and breast cancer awareness.

As a woman, a future mother, I believe that we have the responsibility to help the abused children because they are our future. We gotta give our fullest to stop child abuse.

Also, being a woman, we should take really good care of ourselves especially our health. Without good health, we will not be able to take care of someone we truly love. Thus, to further arouse breast cancer awareness is essential. If I have chance, ~~then~~ I want to meet the breast cancer patients and give them love and mentally support. I want them to know that they are not alone. Thank you.

My message on ending violence against women and child abuse.....

Violence against women and children is unfortunate but still exists across the globe. To prevent violence against women and children we all have a critical Role in Shifting the culture that allows the violence to occur at first place. We need daily acts of courage to confront attitude and Behaviour that justify, excuse and fail to counter such violence. We need to do this in our home, neighbourhood, work place and even further. While we do all of this, we need to promote education based on values and morals to inculcate the idea of Respect to all, because only with respect to all, we will see the other person as equal and any act of violence will be a question against our conscience. Hence, I argue for respect and a culture shift that allows to counter violence. We need to make this world a place where everyone has equal opportunities and Rights and love each other.

My message on ending violence against women and child abuse....

I can easily say that 1 in 4 women have been victimized & I can easily say that over 120 million children have been abused. But why do the numbers continue to grow?

Our job is not only to decrease the number, but our job is to end the statistic for good.

In this world, there should not even be an average number of violence. There should not even be a percentage who experience abuse.

We must be mandated reporters... A helping hand.. The ears of our Women & Children.
By leaving no one behind, I believe that our sisters & our children can live a life free of violence and abuse. We are our own advocates,
And we CAN stop this.

My message on ending violence against women and child abuse.....

As we know that everywhere in the world has the violence to women and child.
For me, the violence should not happen to women and child, not only that but it should not happen to anyone around the world. I believe that we are born for happiness and that we should live with the respect for one another. By using the violence for or a force is not the best solution. We all know that we need to do more and try to be a voice to the injustice of women and child who are the victims of violence.
We need to fight more to stop these kinds of violation, we should live with love and peace.
Finally, I just want to say that we are all born to love and honor one another.
If there is no violence for women and child, the world will be full of joy and happiness.

My message on ending violence against women and child abuse....

As a mental health advocate, I believe that when you abuse a woman or a child physically, verbally and mentally, you are destroying their self worth and taking away their future. Your words and actions has the most powerful force to make or break someone, so use them with wisdom and kindness, use them to heal and to empower.

I stand against any form of violence against women and children because I believe that violence over others is just weakness disguised as strength. True strength is when you can overcome your frustration and anger with compassion & empathy. True strength comes from love, patience and gentleness.

My message on ending violence against women and child abuse....

^^
~

- Hello, I'm from Mongolian.

I think protecting women from violence and harmful acts is an ethical and necessary human right measure of the ethical and necessary human being. However violence against girls and women remains the most common violation of human rights worldwide. We have to stop it. Because we all have the right to live peacefully in planet earth. We need to have stronger laws and regulation in order to protect our children and women. The abusers need to be punished. So that the right of women and children can be preserved. We can...

Thank you.

My message on ending violence against women and child abuse.....

Us human beings, we are creatures of love and empathy. We are naturally ~~wired~~ for compassion. Nobody is born an abuser but after being born, we go through a lot of things. Life happens to us, cruelty happens to us, our parents' trauma gets transferred to us culture. We are who we are because of our conditioning. It is very important to teach a child how to be compassionate and respect other people. If we can introduce emotional intelligence, mindfulness and meditation in schools and colleges and the lives of people. Then the problem of abuse, any kind of abuse will disappear from the map of the world. A person who is centered and is mindful of their thoughts, emotions and actions, they would not hurt any sentient being living along human beings. I hope one day we will live in a world where mindfulness and meditation has gone viral.

My message on ending violence against women and child abuse.....

We are in an era of technology, knowledge, globalization and innovation. The universe also chasing. But inspite of the fact that that we are a developed society there is a growth in women's violence and child abuse. It has been revealed that women's are more likely to domestic violence. There are many laws against women's violence. But they are not aware about it nor fight against it. Therefore a women should have armed with knowledge to take necessary actions against it. Ensuring safety and dignity of a women. Children are not only abused in sexually but mentally, physical. As a precious gift to the society its our role and responsibility to protect and resist child abuse. Most importantly child should be educated about child abuse and convince them that they are never alone. Therefore one of our primary responsibilities should be to create a sensitive society in which the rights of women and child can live in harmony without violence. We must do it in by word and action.

Thank you.

My message on ending violence against women and child abuse....

Violence can be for physical and psychological level. Physical abuse is easily discovered. They are both important issue to care about but I would love to put more focus on psychological level cause they are ~~easy~~ usually ignored by people and not even notice that it is happening. For children, education pressure, overexpectation from parents, teaching style... can be possibly abuse for them. For women, gender stereotype, sexual harassment... can also be part of violence. Sometimes, society give us a framework → framework of how a woman or a child should be like. In my opinion you just have to be yourself, not the perfect model in your society. Too much framework will all cause a lot of pressure and might become abuse on psychology. So I would love to invite everyone to say no to violence against women and child abuse. When meeting such a situation, be brave to say out loud and stand out for yourself. If you notice that ~~and~~ violence is happening, please try to search for help. It's a responsibility for global citizen that I would love to invite everyone to join.

My message on ending violence against women and child abuse.....

Domestic Violence is a violence or the abuse of one person against another in a domestic setting, such as in marriage or cohabitation.

I believe everyone deserves to be happy. Everyone has the right to live life to the fullest. I think

no human should go through such violence especially women and children. Even the bible says,

Don't do unto others what you don't want others to do unto you. To the women who still find themselves in this act should shine a spotlight on it, tell neighbor, a friend and a family.

To those who escaped such act, you are a role model. Come out and share your story. You are brave! Finally let us love one another with all our hearts. Children are the future. ♥

My message on ending violence against women and child abuse.....

Domestic violence doesn't discriminate based on age, race, nationality, gender or sexuality. Although we think domestic violence is just physical assault it is the willful intimidation, battery, sexual assault & or other abusive behavior. Domestic violence & child abuse is beyond physical scarring but mental, emotional & physiological it has on the being is long term & can stay w/ someone for a lifetime.

I am apart of the 38% of women who will experience domestic violence or sexual abuse. I believe we must educate both men & women from child hood to understand how to treat people & how to be treated.

My message on ending violence against women and child abuse.....

Oh, how I wished that women and child abuse never existed. But, it is extremely heart breaking that this can happen to anyone, irrespective to his race, ethnicity, religion and status.

The fact that people have become overly materialistic and exploitive, these issues take birth. Material greed has killed the compassion in human beings. People tend to ignore the sacredness of life. Women and child abuse is widespread and remains a harsh reality for millions people in the world. This is devastating to the victims, society and the future generations. It is time to say a BIG, "ENOUGH IS ENOUGH" to women and child abuse because all we need is a healthy nation living in peace and harmony.

My message on ending violence against women and child abuse.....

As a woman who has experienced child abuse at a young age, I realise it's not enough to merely talk about it because victims usually don't know what actions to take after realising the extent they've been violated, especially when they are young. If there's anything I regret in my life is only speaking up years later, whereas with the right information, support & knowledge, I would have had a different outcome at the time. I see it with my students who confide in me about such matters, sometimes even their mothers, society merely talks about it. It's time to also educate men to protect us and not teach women/children how to not get raped or how to behave only, but also teach men to love and protect. Let's educate men and have places of first response active to receive victims. It should not be a taboo to discuss such matters.
